

2013 I/I Inspection Project

The Town of Dedham Engineering Department is pleased to announce that the 2013 I/I Inspection Project is now complete. This project involved the inspection of approximately 64,100 linear feet (12 miles) of sewer mains and inspection of approximately 198 sewer manholes.

The contractor for the project is National Water Main Cleaning Co. of Canton, MA. Work on the project began in April and was completed in May at a total cost of \$77,381.

The Engineering Department prepared all contract documents, bid and awarded the contract, and performed all resident inspection and contract administration in-house.

This project is part of the overall Inflow and Infiltration reduction project currently underway. The findings of this project will be incorporated into our current rehabilitation contract (also awarded to National Water Main) to remove extraneous clean water that enters the sanitary sewer system.
