The existing street lighting system was originally installed, operated, and maintained by NSTAR/Eversource until the Town acquired the lights in 2008. The Town is not responsible for the utility feeder wires to any lights. The Town's responsibility begins at the connect point to the secondary line at the base of the bracket or from the base of the first pole in the case of underground fed lights. The Town is responsible for the underground feeds to all subsequent lights where the feed serves no other purpose than to supply underground streetlights. The contractor is prohibited from entering utility manholes or from touching the utility wiring. The utility must make and break any connection with its secondary wiring and it is the responsibility of the Selected Contractor to make that coordination after proper notification of the Town point of contact. Please refer to the License Agreement with the utility for specifics. The Town is further not responsible for the accuracy of the inventory but believes it to be reasonably accurate. It is the Contractor's responsibility to verify to the extent necessary the accuracy of the inventory.

3.3 Extra Work

The Owner may request certain extra work by the Contractor. Repair of underground faults, foundations, decorative lamp post replacements, relocation of lights from one pole to another or to a new replacement pole, replacement of faulty wire within the mast arm, storm damage, knockdowns, make-safe emergency response, etc. are all examples of extra work. Such work shall be billed on a time and materials basis following approval by the Owner. Any bidder who cannot perform the required extra work will be rejected as unqualified. The utility will replace joint use poles and electrical service while the Contractor will replace the streetlight and bracket. Coordination with the utility will be necessary to complete this work and the Owner

requires the Contractor to complete this coordination. In the case of underground fed, dedicated poles, they are the property of the Owner.

3.4 Length of Contract, Volume of Work, Emergency Response:

A one (1) year contract term commencing upon signature of the contract through December 31, 2023 with two additional one-year options at the sole discretion of the Town from January 1, 2024 – December 31st, 2024, and January 1, 2025– December 31st, 2025 respectively

The Town reserves the right to request a price quote for services prior to the start of work. Should a price quote be requested, successful bidder(s) shall present price quote for approval and acceptance by the Town's designated representative. All related warranty information or Material Safety and Data Sheet ("MSDS ") information shall be included as part of the any/all price quote package. If not included in the price quote package, no additional costs or fees, including but not limited to, fuel surcharges, freight & handling, travel, etc., shall be assessed or billed to the Town by the bidder.

The frequency and volume of work under this contract will fluctuate throughout the year as work volume and budget allows. The primary purpose of this contract is to provide maintenance services of the municipal street light system. The Town may also schedule work outside of emergency situations. The Town retains the right to schedule work as it deems necessary depending on need and funding.

The scope of the contract shall also include work required in emergencies at any time on a twenty-four hour per day, seven days per week basis to protect the public and to facilitate the restoration of essential public services including, but not limited to, highway travel, electrical service or any other work as deemed necessary by the Director of Public Works.

The scope of the contract also includes response to weather-related emergency conditions both during and after a weather event. The awarded vendor must be capable of providing all the crews as required under the Emergency Response Requirements section.

The Town also retains the right to utilize its own workforce to address all aspects of this contract as well as work with additional outside vendors when the Town determines it is in the best interest of the Town.

Section 3.5 Qualification Standards

3.5.1 A Contract WILL ONLY BE AWARDED to a Vendor that meets the minimum requirements of this scope of work. This includes but is not limited to the following:

Award will be made to qualified bidders presently engaged in maintaining and servicing municipal streetlight and associated equipment, including on and emergency on-call basis. The contractor must be able to service and maintain Town streetlights on a twenty-four (24) hour, seven (7) day a week basis, including holidays.

The Town of Dedham will consider, at a minimum, the following criteria:

- Bidders must have no less than three (3) years' experience maintaining a municipal or government owned street lighting system of at least 1000 streetlights.
- Demonstrated experience in the service for which this response is being submitted.
- Responsiveness of this Invitation to Bid specifications and instructions.
- Past performance for and recommendations from other public and private clients.
- Ability to meet response time.
- Have satisfactory reports from all street lighting maintenance contracts. Any unsatisfactory reports may at the sole discretion of the Owner result of rejection of the Bidder as unqualified.
- Have sufficient licensed electricians and or journeyman linemen on staff with International Municipal Signal Association (IMSA) Roadway lighting Level I certification to perform the required scope of work. Minimum manning of IMSA qualified personnel is one per six communities serviced (all contracts) including Dedham. All work must be performed by IMSA qualified personnel. Provide a list of personnel assigned to do the work in Dedham and copies of their IMSA certification. Provide also the number of existing municipal street lighting contracts you currently serve with the street light counts for each community. Consideration will be given when communities are adjoining. Use of non-qualified personnel is justification for immediate termination of the contract.
- The Bidder has the necessary staff and equipment to perform the work or demonstrated the ability to have the necessary manpower and equipment within a reasonable time (2 weeks) from contract award in addition to any other existing ongoing contracts. Have at least two insulated bucket trucks capable of reaching 35 feet. Demonstrate availability either through ownership, lease, loan, or partnership of other needed equipment such as pole trucks, auger trucks, jackhammers and associated compressors, cranes, etc. as may be typically required for street light maintenance and repairs including knockdowns or decorative underground fed lighting.

- Demonstrated ability and experience to satisfactorily install streetlights on wood, metal, and concrete poles including installation of the poles both with and without foundations and associated underground service.
- Provide a list of references for all related work over the past two years.

Answers to the above questions shall be submitted in a written format and may include any additional information the Bidder wishes to provide but must as a minimum address the above-listed items. A simple statement of qualification will not be sufficient. The Bidder must provide specific examples in sufficient detail for the Owner to determine from the written justification that the above minimum qualifications are satisfied. If the Bidder believes you have examples of work which would be the equivalent of the above qualifications, you may submit them for consideration. The Owner will consider any such submission but reserves the right to reject any that in its opinion are not equivalent. Failure to satisfactorily address each of these issues will result in rejection of the bid at the sole discretion of the Town.

3.5.2 Contract Value

All bids shall be based on the quantities set forth on the Bid Form. These quantities shall be used as a basis for the comparison of the bidders' proposals, and for determining an estimated annual contract value.

While the quantities are based on the Town's best estimates of work to be performed during the term of this contract, the Town reserves the right to increase or diminish the amount of any class or portion of the actual work in accordance with its actual requirements without change of price per unit.

Nothing herein shall be construed as a guarantee of the quantity of work to be performed under this contract and the Contractor will be paid only for work actually performed pursuant to the contract.

3.5.3 General Standards

The Contractor's work shall be done in a competent, professional, proficient manner and performance thereof and all materials and facilities furnished by him shall be to the satisfaction of the Director.

All work areas shall be kept in such a manner so as to cause as little inconvenience as possible to the general public and adjacent property owners. When it is necessary to close pedestrian walks, vehicular traffic lanes or private access roads and drives, the Contractor shall provide personnel. Barricades, warning signs, cones, flags or other means required by governing rules and ordinances, along with notifying the affected property owner or resident. Driveways are not to be blocked with debris at any time.

In the event the Town's Contract Supervisor determines that a police detail is required during the performance of work under this contract, the Town shall arrange for said detail, the cost of which will be borne by the Town. The Town shall have sole discretion to determine when a police detail is required.

The Contractor is required to maintain all work areas in a safe fashion, especially during times when a police detail is not required. The Contractor will set up all necessary caution signs, high visibility flags, traffic cones, etc., at all times while working in the Town.

All wood, brush and debris must be disposed of properly and in compliance with the requirements as pursuant to the provisions contained herein. Any debris left must not block vehicular or pedestrian traffic, and/or access to homes, or other private or public property (except as otherwise directed by the Contract Supervisor).

The Contractor shall carefully protect against damage to all existing trees and plants. The contractor shall be liable for any and all damage to such trees, plants, real property and vehicles, and shall replace, repair, restore or provide for returning the same to their original condition, to the satisfaction of the Contract Supervisor.

3.5.4 Requirements Regarding Private Property

The normal access to a job site shall be along public roadways. Should work require the Contractor to place equipment and/or personnel on private property, the Contractor shall obtain the property owner's permission in writing and shall notify the Contract Supervisor prior to the work. The Contract Supervisor may provide a permission/indemnification form to be used for this purpose.

The Contractor shall be required to deal directly with private citizens with respect to repairing and/or replacing damaged bushes, shrubs, and other damage to private property that may be caused by the Contractor in connection with work performed pursuant to this contract. A report in writing concerning such damage and action taken to correct the damages shall be given to the Director of the Public Works Department if requested by the Director.

The Contractor shall respond to the Director within 24 hours in regard to all complaints of damage to private property alleged to have been caused by work performed by the Contractor. In case of such damage, the Contractor shall be required to make arrangements with the homeowner to remedy the damage. The Contractor shall make or effectuate any such repairs within thirty (30) days of the date of the damage, or within such additional times as agreed in writing between the Contractor and homeowner.

In order to assist the Town in the processing of claims for property damage, the Contractor shall be, at the Town's discretion, required to prepare a written report, on a form to be provided by the Director of Public Works, as to the condition of the tree in each instance when the Contractor removes a tree and/or limb which has damaged private property including automobiles and damage to residential and commercial property.

The Contractor shall provide written reports and respond to requests by the Director related to investigations of claims against the Town for property damage and personal injuries claimed to be caused by incidents of falling trees or limbs including, wherever possible, reports of damage caused by trees that fall during storm conditions.

Employees are not able to answer a question or satisfy a citizen request, then the Contractor shall refer the citizen to the Contract Supervisor as well as contact the Contract Supervisor right away.

Prevailing Wage Rates

As determined by the Director under the provisions of the
Massachusetts General Laws, Chapter 149, Sections 26 to 27H

LAUREN JONES
Secretary

MICHAEL FLANAGAN
Director

Awarding Authority: Town of Dedham
Contract Number: 20230007 **City/Town:** DEDHAM
Description of Work: the Town of Dedham seeks bids from qualified vendors to provide service and repair to the municipal street light system of the Town of Dedham
Job Location: 450 Washington St

Information about Prevailing Wage Schedules for Awarding Authorities and Contractors

- **The wage rates will remain in effect for the duration of the project, except in the case of multi-year public construction projects. For construction projects lasting longer than one year, awarding authorities must request an updated wage schedule no later than two weeks before the anniversary of the date the contract was executed by the awarding authority and the general contractor.** For multi-year CM AT RISK projects, the awarding authority must request an annual update no later than two weeks before the anniversary date, determined as the earlier of: (a) the execution date of the GMP Amendment, or (b) the execution date of the first amendment to permit procurement of construction services. The annual update requirement is not applicable to 27F "rental of equipment" contracts. **The updated wage schedule must be provided to all contractors, including general and sub-contractors, working on the construction project.**
- This wage schedule applies only to the specific project referenced at the top of this page and uniquely identified by the "Wage Request Number" on all pages of this schedule.
- An Awarding Authority must request an updated wage schedule if it has not opened bids or selected a contractor within 90 days of the date of issuance of the wage schedule. For CM AT RISK projects (bid pursuant to G.L. c.149A), the earlier of: (a) the execution date of the GMP Amendment, or (b) the bid for the first construction scope of work must be within 90-days of the wage schedule issuance date.
- The wage schedule shall be incorporated in any advertisement or call for bids for the project as required by M.G.L. c. 149, § 27. The wage schedule shall be made a part of the contract awarded for the project. The wage schedule must be posted in a conspicuous place at the work site for the life of the project in accordance with M.G.L. c. 149 § 27. The wages listed on the wage schedule must be paid to employees performing construction work on the project whether they are employed by the prime contractor, a filed sub-bidder, or a sub-contractor.
- Apprentices working on the project are required to be registered with the Massachusetts Division of Apprentice Standards (DAS). Apprentices must keep their apprentice identification card on their persons during all work hours on the project. An apprentice registered with DAS may be paid the lower apprentice wage rate at the applicable step as provided on the prevailing wage schedule. **Any apprentice not registered with DAS regardless of whether they are registered with another federal, state, local, or private agency must be paid the journeyworker's rate.**
- Every contractor or subcontractor working on the construction project must submit weekly payroll reports and a Statement of Compliance directly to the awarding authority by mail or email and keep them on file for three years. Each weekly payroll report must contain: the employee's name, address, occupational classification, hours worked, and wages paid. Do not submit weekly payroll reports to DLS. For a sample payroll reporting form go to <http://www.mass.gov/dols/pw>.
- Contractors with questions about the wage rates or classifications included on the wage schedule have an affirmative obligation to inquire with DLS at (617) 626-6953.
- Contractors must obtain the wage schedules from awarding authorities. Failure of a contractor or subcontractor to pay the prevailing wage rates listed on the wage schedule to all employees who perform construction work on the project is a violation of the law and subjects the contractor or subcontractor to civil and criminal penalties.
- Employees not receiving the prevailing wage rate set forth on the wage schedule may file a complaint with the Fair Labor Division of the office of the Attorney General at (617) 727-3465.
