

2017 I/I Inspection Project

The Town of Dedham Engineering Department is pleased to announce that the 2017 I/I Inspection Project is ongoing since March of 2017. This project will involve the inspection of approximately 130,000 linear feet (24.6 miles) of sewer mains.

The contractor for the project is National Water Main Cleaning Co. of Canton, MA. Work on the project began in March and is anticipated to be completed in June.

The Engineering Department prepared all contract documents, bid and awarded the contract, and performed all resident inspection and contract administration in-house.

This project is part of the overall Inflow and Infiltration reduction project currently underway. The findings of this project will be incorporated into our current rehabilitation contract (also awarded to National Water Main) to remove extraneous clean water that enters the sanitary sewer system.
