

## **2018 I/I Inspection Project**

The Town of Dedham Engineering Department is pleased to announce that the 2018 I/I Inspection Project is now complete. This project involved the inspection of approximately 104,500 linear feet (19.8 miles) of sewer mains, 113 sewer laterals and 455 sewer manholes

The contractor for the project responsible for inspection of the sewer mains and laterals was Rapid Flow, Inc. of Revere, MA and the consultant for the project responsible for the inspection of the sewer manholes was Weston & Sampson. Work on the project began in March and was completed in September at a total cost of approximately \$126,700.

The Engineering Department prepared all contract documents, bid and awarded the contract, and performed all resident inspection and contract administration in-house.

This project is part of the overall Inflow and Infiltration reduction project currently underway. The findings of this project will be incorporated into our current rehabilitation contract (also awarded to Rapid Flow, Inc.) to remove extraneous clean water that enters the sanitary sewer system.
